Yard

Yard charges are now calculated to take account of the length of the boat, type of keel, whether multi-hull, whether parked under cover, whether project status or visitor and whether using the clubs stands / legs.

This is all done using a spreadsheet, which also works out the charges for 'Wise Lift' and 'Set Down' as these are now specific to each boat, taking account of the size of boat, type of keel, whether multi-hull and so on. Charges for stands and frames are also now included in the daily yard charge calculated for a particular boat.

This is fairer, but it does make it harder for members to understand how their invoice was calculated. What we have done is prepare a copy of the actual spreadsheet used (with 2024/25 prices) where you can input details of your boat and check your invoice is correct (you can also experiment, to see the impact of changing different settings such as off station rates). If you have some spreadsheet skills you can examine exactly how the pricing model works. We also provide a more detailed 'explainer' that was shared by the TNA when this was launched.

Storage of member owned trailer-sailors, trailer-motor-boats, dinghies and kayaks is subject to availability of suitable space. Yard fees for these vessels uses the same fee calculator as cruisers but slightly higher because they do not also have a mooring. They will be charged a <18 month rate as long as they are 'active', meaning they have been used on the water four times in the year. If such a boat is inactive for more than 18 months they will be charged the >18 month rate and if still inactive after 36 months they will be charged the 36 month rate. It is the members responsibility to provide proof of activity, such as a time stamped WhatsApp photo of the boat on the water.
