| - | The old website performed some functions that the new web site does not - such as event planning and booking forms for the yard and other activities. The decision was made to keep the new website a bit simpler by handling those functions seperately. Since this is being managed by volunteers and a small budget - we have first created the new 'public' website and will then begin work on all the inter active stuff. |

## Looking for something?

As you will likely be aware, the club experienced a catastrophic failure of the members portal website. We are in the process of building a new members portal, but will provide some temporary solutions for things that were there. Watch this space... and we will announce on the TNA.

There is however a new Events Calender which you can see under the members corner menu on the left.

We are still working on updating our Web / IT infrastructure and since we are volunteers it might take a bit of time. If you have a question or suggestion please email: [it@greenwichyachtclub.co.uk](mailto:it@greenwichyachtclub.co.uk)

| Riddle of the sands                                                                     | Erskine Childers | Reputedly the first ever spy novel, and written as a warning about the massing of German naval power before the start of the first world war. A great read, and although fictional his great personal experience of sailing shoal draft craft around the eastern North sea coast shines through.                                                                 | <a href="https://www.amazon.co.uk/Riddle-Sands-Erskine-Childers-ebook/dp/B01KY1YZ2S/">https://www.amazon.co.uk/Riddle-Sands-Erskine-Childers-ebook/dp/B01KY1YZ2S/</a>                 |

| The book of tides                                               | William Thomson    | Non fiction, written by a graphic artist who has travelled the coasts of the uk with his young family in a camper van to surf. It's written in a refreshingly direct style, and is full of intriguing observations, facts and trivia about everything to do with tides, all explained with expert diagrams. It's not a text book, nor a travelogue. The reviews on Amazon give a flavour of what to expect. | <a href="https://www.amazon.co.uk/Book-Tides-William-Thomson/dp/1786480794/">https://www.amazon.co.uk/Book-Tides-William-Thomson/dp/1786480794/</a>                           |
